

## **Quality policy of bar GmbH**

### **Self-conception**

With the manufacture and worldwide distribution of pneumatic and electric rotary actuators as well as complete automatic valves and a wide range of accessories, bar GmbH is an important partner for many well-known industrial companies. bar GmbH is constantly working on product developments and innovations for plant engineering and process engineering applications in industry. The special competence lies in customer-specific system solutions.

The high quality of our products is one of the foundations of our successful business activities. It is an important criterion for the purchase decision.

### **Continuous improvement**

The company is committed to the continuous improvement of its products, its processes and the satisfaction of its customers, suppliers and employees. To this end, processes are in place within the company to ensure that errors are identified at an early stage and that measures can be initiated immediately to rectify them and prevent them in the future. In addition, all processes at bar GmbH are subject to constant and regular evaluation in order to continuously improve the company's quality management system.

### **Consideration of the environment**

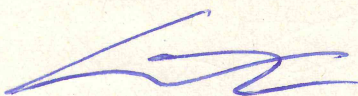

Our company has conducted a detailed analysis of internal and external interested parties and their specific interests (issues). This analysis is included in all corporate decisions.

### **Risks and opportunities**

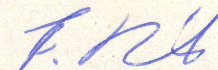

In order to be able to continue to operate on the market in a future-oriented manner, all risks that could have an influence on the company are generally analyzed, evaluated according to their significance and avoided or mitigated with appropriate measures.

All requirements of DIN EN ISO 9001:2015 are taken into account in all areas, processes and corporate decisions.
